POST SHOW REPORT

2022 & 2024

RENEWABLE ENERGY | NEW ENERGY | GREEN HYDROGEN | ENERGY STORAGE

Event Overview

Welcome to the Clean Power & New Energy Conference, the region's premier platform for driving the transition towards cleaner, more sustainable energy solutions. Designed as the most efficient and targeted event for utility-scale renewable companies, it brings together leaders, innovators, and changemakers from across the clean energy spectrum — from wind and solar to emerging renewable technologies. By uniting diverse energy solutions under one roof, the conference creates more value for participants, enhancing opportunities to network, broadening educational horizons, and providing exclusive access to decision-makers from large-scale developers, corporate buyers, utilities, and government bodies.

With the 2024 theme, "Tripling Renewable Power & Doubling Energy Efficiency by 2030", this event serves as a rallying point for exploring the latest innovations, financing models, regulatory frameworks, and collaborative strategies shaping the energy landscape. Over two days, attendees will engage in insightful discussions and technical deep-dives with international ministers, energy CEOs, policymakers, and industry experts, tackling the critical trends driving the global shift to net-zero emissions.

More than just a gathering, the Clean Power & New Energy Conference is a pivotal moment in the clean energy journey — fostering impactful partnerships, accelerating the adoption of renewable technologies, and ensuring that clean, secure, and affordable energy becomes a reality for all.

Health Cost Savings

Avoided health costs per year:

3.5% of country GDP

Lives lost to air pollution that we could save each year:

9,353

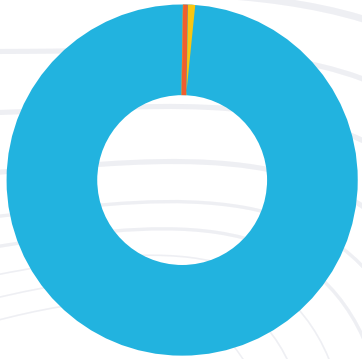

The transition pays for itself in as little as **1.8 years** from air pollution and climate cost savings alone

Land Usage

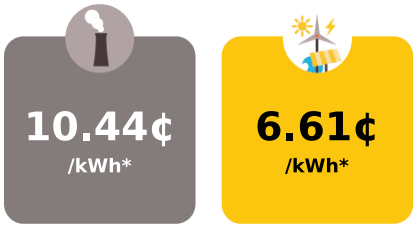

Percentage of Malaysia Land Needed for All New Wind, Water & Solar Generators

0.43% Footprint Area

0.31% Spacing Area

Average Energy Costs in 2050

Fossil Fuels & Nuclear Energy

Wind, Water & Solar

*Health and climate externality costs of fossil fuels per kWh are in addition to the fossil fuel cost shown above.

Money in your Pocket

Energy cost savings per person:

$423.80

Energy, health, and climate cost savings per person:

$9,757

2022-2024 HIGHLIGHT

Renewable Energy Trends

Discover the latest innovations in green hydrogen, solar, wind, and energy storage technologies.

Regional Challenges

Explore ASEAN's energy transition challenges and opportunities for renewable energy development.

Investment Insights

Gain valuable insights into investment growth and market dynamics from industry experts.

Energy Efficiency

Understand the role of AI and big data in optimizing energy efficiency and clean energy manufacturing.

National Strategies

Learn about Malaysia's pathways to achieve net-zero emissions by 2030 and accelerate low-carbon transportation.

Hydrogen Economy

Explore the potential of the hydrogen economy and global collaboration initiatives driving clean energy adoption.

Our Partners

New Chapter

Our industry has evolved, and it is important that our conferences evolve to meet your business needs. Clean Power & New Energy's mission is to not only bring together the different technologies that make up the renewables mix; onshore wind, offshore wind, solar, storage, and transmission but also the different segments within the industries; manufacturers, construction firms, owner operators, utilities, financial firms, corporate buyers and more.
